AFA Membership Promotion Committee

Hi! Many of you may not be aware that the Membership Promotion Committee has both some new faces and new goals this year.

As Dr. Baer mentioned at the 1978 Dallas convention this August, AFA's objective this year is to double its membership.

While the state coordinators have by this time received a detailed memo outlining some techniques and procedures for increasing membership, doubling our ranks is going to require a little work on everyone's part.

Each AFA member should attempt to increase the size of our organization by enrolling 2 new members this year. There are people we all know who should belong but don't. Show them Watchbird and explain to them what AFA represents and can Glen Burnie, MD 21061

do for them.

Put an application in their hand and get them signed up. The next time you see them ask if they have joined — if not, talk it up some more — repeat this procedure as often as necessary to achieve success.

Applications and a mimeo explaining AFA are available through your club delegates and state coordinators. Remember Numbers Talk. (But only if we do first!)

If anyone out there wishes to become a member of the membership promotion committee or has any ideas that would help, please drop me a line.

Tim Dahle Membership Promotion Committee Chairperson 913 Genine Dr.

In the Dec/Jan '79 issue of Watchbird (Volume V, Number 6) there is an error in the sequence of type on page 21. In the center column, the top 4 lines should be added to the bottom of the column. This change restores continuity to the article.

SUPER PRFF

Nutritional Tonic and Feed Mix Concentrate for Show Birds Large and Small – from Finches to Pheasants

Super Preen is formulated in our own laboratories of pure health food and pharmaceutical grade raw materials as used in human nutrition and is dated for your protection to insure freshness and potency in every container. Super Preen's vital nutritional formula was developed in consultation with aviary veterinarians and has been used and recommended by respected aviary clinics and hospitals across the country for more than four years. Contains no preservatives or modifying chemicals.

BE A WINNER EVERYTIME! • General overall improvement in appearance and performance usually within 2 weeks Better immunity to disease • Brighter eyes, glossier feathers, increased stamina and endurance Year round show condition for your birds Increased egg fertility Better, faster, and more complete moult

Super Preen eliminates the need for multiple products such as cod liver oil, wheat germ, brewers' yeast and other vitamin/ mineral formulas. Super Preen contains all essential amino acids in the desired proportion, and includes natural fruit sugars from apples and dates which are essential for the proper assimilation of amino acids, especially during periods of stress,

DON'T GIVE YOUR BIRDS Yes, we could make Super Preen in liquid form, but we feel that adding the chemical modifiers necessary to suspend vitamins in a liquid would be less economical, A CHEMICAL FEAST! less efficient, less stable, and could even be detrimental to your birds' health.

400 Grams NUGGETS — Canadian Peas coated with Super Preen for easier feeding of larger birds and hook bills. \$12.95 (3.2c per day)

Available at your local pet store or oder directly. Dealer inquiries invited. (714) 547-6462
